### Chairmen's Message on Q2'FY26 Financial Results | 1/2

Mr. Shyam S Bhartia Chairman & Mr. Hari S Bhartia Co-Chairman

"We are pleased to share the financial results for the second quarter of this fiscal year. Our Speciality Chemicals segment continues to drive the growth momentum with double digit YoY revenue growth and a positive growth over last quarter. Our Nutrition business maintained a steady volume growth trajectory across both the core products. Meanwhile, our Chemical Intermediates business clocked highest quarterly sales across value and volumes in last six quarters.

Despite the challenging market conditions, we have grown revenues on the back of growth in volume-market-share and maintained profitability. This quarter, our EBITDA grew by 8% year-over-year, and our Profit After Tax saw an impressive 18% increase. On a half-yearly basis, EBITDA grew by 18%, and Profit After Tax surged by 34%.

### **Markets Update:**

Across the broader **Chemicals Industry**, we're witnessing a steady recovery in volumes, even as pricing remains under pressure across all segments. At the same time, many global players, especially players in Europe are reporting deteriorating financials due to weaker demand, continued pricing pressure and elevated energy costs.

**The pharmaceutical end-use market** continues to show steady volume growth, supported by stable pricing. We saw consistent volume expansion across CDMO and Fine-Chemicals products. Additionally, we saw a marginal recovery in volumes last quarter within the Paracetamol segment.

The global **Agrochemical sector** has successfully moved beyond the inventory destocking phase, with volumes now stabilizing and showing clear signs of growth. This upward momentum is supported by strong volume expansion on both YoY and QoQ basis. Pricing in the segment has remained stable over the past few quarters, reinforcing the recovery trend.

The **Nutrition market** recorded steady volume growth during the quarter though feed-grade vitamins pricing showed short-term volatility globally and in India. Niacinamide demand showed a modest uptick as customer purchasing activity resumed, following subdued volumes at the start of the financial year. Choline volumes traditionally dip in Q2 (versus Q1) due to festivals, however we have seen a notable YoY volume increase.

## Chairmen's Message on Q2'FY26 Financial Results | 2/2

Mr. Shyam S Bhartia Chairman & Mr. Hari S Bhartia Co-Chairman

### **Business Update:**

The Specialty Chemicals segment continued on its revenue growth trajectory and reported 25%+ margins during the quarter, driven primarily by strong performance in Fine Chemicals and CDMO sales. We successfully delivered volumes against one of our new Agro CDMO innovator contract in Q2. In last few quarters, we have added 10+ new molecules in our CDMO/Fine chemicals portfolio, which have already started to show in our FY26 revenues, and are expected to contribute 1200cr+ of peak annual revenues in coming years. We have another 10+ opportunities in advanced stages of discussions, which we hope to convert in coming quarters.

The Nutrition and Health Solutions business segment grew volumes on YoY basis, with volume growth seen across most segments. Revenue remained steady as overall pricing in the nutrition segment was slightly lower due to competitive pressures, which had a bearing on margins as well. Our new cGMP facility is ramping up and continues to drive growth in cosmetic-grade sales. The EU's anti-dumping duty on Chinese origin Choline products are creating a good pipeline which would get realized in coming quarters, with early orders already booked in Q2.

In **the Chemical Intermediates segment**, our strategic initiatives on Ethyl Acetate and Acetic Anhydride sales drove a notable QoQ and YoY growth in volumes and revenue, clocking highest quarterly revenue and volumes in last six quarters. We have continued to secure and grow our domestic and global market share despite market pricing pressures. With our sustained focus on cost efficiency, we successfully maintained margins in line with the previous quarter.

#### **Future Outlook:**

Looking ahead to H2'FY26, we expect continued growth momentum, fueled by progress in our Specialty Chemicals and Nutrition businesses, along with an expected part-recovery in the Acetyls portfolio. We're also on track to start serving our major CDMO order in early 2026, a milestone that is expected to significantly accelerate our growth trajectory in the CDMO segment. To meet the increased demand in CDMO, we did ground-breaking of our new MPP in Gajraula, which we hope to complete by late 2026."

# Market Overview Q2'FY26: Volumes continue to recover across segments amidst pricing pressures; short-term tariff related uncertainty remains

### PHARMA

- · Volumes remained steady across segments, especially in our core products in Fine Chemicals
- Prices remained stable in most segments; Customers await clarity on tariff situation thus delaying decisions in a few opportunities
- Paracetamol segment volumes witnessed moderate growth, with all players pushing for plant utilizations; pricing remained muted

#### AGROCHEM

- Agrochemical volumes are rising steadily worldwide and in India, with Pyridine-based products showing consistent recovery
- Segment prices have stabilized, though Pyridine & Picoline saw short-term volatility that may ease in upcoming quarters.

### NUTRITION

- Niacinamide demand remains strong, with prices under short-term pressure in Q2FY26; marginal recovery noticed towards the end of quarter, which is expected to continue into current quarter
- Choline (B4) demand is stable, and with EU tariffs favoring non-Chinese suppliers, European inquiries are beginning to rise.

# Several milestones in Q2FY26, further strengthening and accelerating our Pinnacle journey (not exhaustive)

#### **Business**

- Overall: Highest Quarterly Revenue, Sales volume in last 10 quarters
- Acetyls: Highest revenue and volumes in last 6 quarters; market share gain in India
- Specialty: Product diversification and CDMO push: Increased traction in Diketene derivatives with share gain
- Nutrition: Highest B3 volume sales in last 6 quarters; Choline push in Europe
- EU sales grew 30% QoQ

### People / Org

- Senior Talent additions continue: New Head of Nutrition and Health Ingredients; US BD Head, etc.
- Expansion of R&D and Technology teams to support new CDMO opportunities

#### Customer

- KAM: Opportunity funnel expansion to 100+ (70 in Q1)
- Confirmed: 10+ molecules in last year,
   INR 1200cr peak revenue
- Advanced stage: 10+ molecules, INR
   1000cr peak revenue
- Successfully shipped volumes of Agro-Innovator product
- Nutrition pipeline: EU Choline, specialty pre-mixes push

### Innovation/R&D

- ~50 products in R&D pipeline across businesses
- 18 new product launches expected in FY26

### **Operations / ESG**

- Green power impact showing up:
   Power & Fuel expense dropped 16%
   YoY despite volume growth; O2 Power started in Bharuch; (Ingrevia Renewable power share: 28%)
- Lean initiatives: 100cr+ savings program on track
- ESG efforts recognition: ICC Sustainability Award in Water Stewardship Category

### Capex

- On-track: Q4 commissioning of \$300M Agro-Innovator project; New Boiler in Bharuch to be commissioned in Q3FY26
- Groundbreaking of new MPP at Gajraula; Semi-conductor R&D at Gr Noida soon

### Revenue & EBITDA during the quarter was impacted on account of:

# **Specialty Chemicals**

High Double Digit Growth in Pyridine Derivatives on both QoQ and YoY basis

Diketene Derivatives growth momentum continues on both QoQ & YoY basis

Commencement of supply for Agrochem CDMO contract with Innovator

1. All figures are in Rs Crore unless otherwise stated

# Nutrition & Health Solutions

Highest volumes achieved in B3 & B4; Pricing softening off-set revenue growth

Multiple new queries and orders received from Europe

Witnessed growth in Speciality Vitamin B3 products, including cosmetics grade B3

# **Chemical Intermediates**

Significant volume growth seen across key products- Acetic Anhydride and Ethyl Acetate on both QoQ and YoY basis

Expanded domestic as well as European market share.

### **Lower costs**

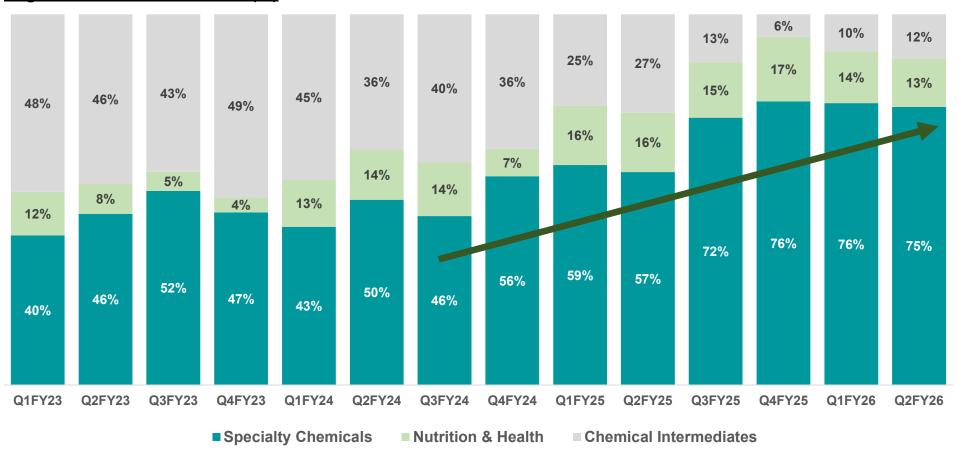

Lower input costs and the impact of Lean 2.0 boosted our competitiveness amid global economic uncertainty

Personnel costs in Q2'FY26 lower than Q2'FY25 and level with Q1, despite increments

## Portfolio Shift: Spec Chem and Nutrition continue to drive EBITDA; Chemical Intermediates share inching with marginal recovery

### **Segment-wise EBITDA Share (%)**

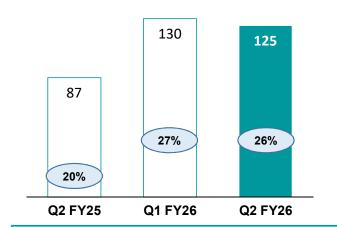

### **EBITDA** trends: Stable margins in Specialty, though Nutrition margins impacted by short-term price volatility; Acetyls showed marginal and gradual recovery

### **Specialty Chemicals**

### EBITDA (Rs Cr.)

Y.o. Y Growth 44% Q.o.Q De-Growth -4%

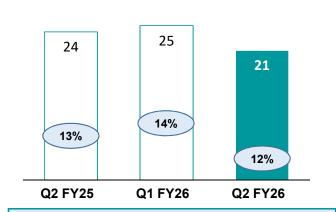

- CDMO, Fine Chemicals portfolio and Agrochemicals volumes grew on QoQ basis
- Margin decline was mainly driven by temporary price softening in key products: Pyridine & Picolines, and some of their derivatives

### **Nutrition**

### EBITDA (Rs Cr.)

Y.o. Y De-Growth -13% Q.o.Q De-Growth -15%

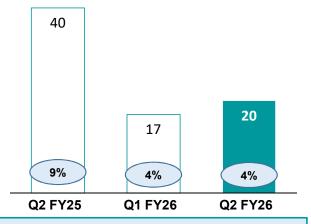

- B3 volumes increased both QoQ and YoY. though QoQ, margins were impacted by temporary pricing pressure in B3 Feed.
- Choline feed volumes increased YoY: continued expansion in specialty and premixes segments

### **Chemical Intermediates**

### EBITDA (Rs Cr.)

Yo Y Growth -51% Q.o.Q Growth 18%

- QoQ and YoY growth driven by volumes uplift across Acetic Anhydride, Ethyl Acetate, and Acetaldehyde
- **Pricing pressure continued** across Ethyl Acetate and Acetic Anhydride, partially offsetting volume gains

EBITDA Margins – Before adjustment of Unallocated corporate expense/Income

# **Specialty Chemicals | Market, Business & Financial Highlights**

### MARKET HIGHLIGHTS

- Pharma End-use demand continued to show positive momentum, improvement witnessed on YoY and QoQ basis
- Pricing remained stable and consistent

- Volumes recorded continued growth
- Inventory Destocking issue is largely over
- Witnessed marginal price softening in pyridine and its derivatives; expected to reverse in coming quarters

- Increased traction from customers across Pharma, Agro, Semi-conductor, Cosmetics/Nutrition segments
- 100+ new opportunities in CDMO/ Fine Chemicals portfolio with 3.5Kcr+ peak revenue potential; 10+ molecules added in last one year with 1200cr+ peak revenue potential; 10+ more in advanced stages

### BUSINESS DRIVERS

- Segment revenue growth was driven by increased sales across CDMO, pyridine and diketene portfolios
- Margins continued to remain above 25% trajectory, on account of:
  - Higher offtake from Fine Chemicals and CDMO offerings
  - Ongoing cost optimization initiatives
- Sequential drop in EBITDA was driven by short-term price volatility in Pyridine and Picolines, and some impact from Pyridine plant shutdown in Q2

# Nutrition & Health Solutions | Market, Business & Financial Highlights

### MARKET HIGHLIGHTS

- Market demand remained steady with Q1 roll-over orders creating marginal uptick
- Competition volume push weighed on global prices.

- Cosmetic-grade demand grew steadily on both QoQ and YoY basis
- Prices for both food-grade and cosmeticgrade products remained stable

- Q2 typically sees lower volumes due to festivals, but showed steady YoY growth.
- EU queries rose after anti-dumping duties on China; Jubilant well-positioned with approvals in 3 countries and first batch shipped. Remaining markets to be covered by H2.

### BUSINESS DRIVERS

- Despite strong volume growth, in both B3 and Choline, overall revenue growth remained modest due to short-term pricing pressures across the nutrition portfolio.
- Margins trended lower and remained within the 12%–14% range driven by price decline; expected to increase in coming quarters as prices recover and share of cosmetic/food grade increases in overall mix

- All figures are in Rs Crore unless otherwise stated.
- 2. Before adjustment of Unallocated corporate expense/Income

# Chemical Intermediates | Market, Business & Financial Highlights

### MARKET HIGHLIGHTS

- Increase in India market volumes with marginal uptick in agro and paracetamol
- Continued market challenges in Europe, driven by weak demand outlook and plant closures

- Continued lower acetic acid prices, putting ongoing pressure on anhydride prices
- Lean initiatives supported to offset pricing pressure

- Segment realization were lower on QoQ basis
- Prices remained subdued, driven by the pass-through of lower raw material costs, and an oversupplied market
